

REMARKS

In the Title

Please substitute the following Title for the pending Title.

SMOKING SYSTEM COMPRISED OF A JEWELRY OR ORNAMENTAL SMOKING
DEVICE AND A SMOKING MIXTURE

In the Claims

Please cancel claims 9-20 without prejudice or disclaimer.

Please substitute the following clean copy text claims for the pending claims of the same number:

1. (Amended) A smoking system comprising:

an ornamental smoking device comprising,

 a camouflaging body, externally formed in an ornamental shape that is comprised of a thermally insulating material;

 a receptacle, concealed in the camouflaging body, and adequately shaped to receive a smoking mixture;

 a mouthpiece, concealed in the camouflaging body and communicating with the receptacle in the camouflaging body to enable a user to draw smoke; and

 a screen and a filter, mounted within the camouflaging body in a manner to enable fluid passage and fluid filtering while substantially blocking passage of the smoking mixture from the receptacle through the mouthpiece; and

Customer No.: 31561
Application No.: 10/064,079
Docket NO.: 8969-US-PA

a smoking mixture formed in a prescribed shape, wherein a user places said smoking mixture into said receptacle that is concealed in said camouflaging body of said ornamental smoking device for smoking said smoking mixture.

2. (Amended) The smoking system of claim 1, wherein the screen and the receptacle are formed as a single integral screen receptacle element.

3. (Amended) The smoking system of claim 2, wherein the screen receptacle is detachably mounted to an opening of the smoking device.

4. (Amended) The smoking system of claim 3, wherein the screen receptacle is detachably mounted to a hollow base of the smoking device having a hollow interior in which is positioned the screen receptacle, the hollow interior further communicating with the mouthpiece.

5. (Amended) The smoking system of claim 4, wherein the smoking device is configured to be able to receive water within the hollow base by detaching the screen receptacle, the water being used to cool down drawn smokes.

6. (Amended) The smoking system of claim 1, further provided with at least a mounting element that enables a user to wear the smoking device as a jewelry item.

7. (Amended) The smoking system of claim 6, wherein the mounting element includes a chain, a holding ring, a necklace, a clasp, or a pin.

8. (Amended) The smoking system of claim 2, wherein the screen receptacle is formed in a funnel shape so as to enable the placement of a loose smoking mixture in the smoking device by dipping the screen receptacle into the loose smoking mixture.

Please add the following new claims:

21. (newly added) The smoking system of claim 1, wherein the smoking mixture comprises a plurality of compacted basic regularly shaped constitutions that is ready to be smoked.

22. (newly added) The smoking system of claim 21, wherein the basic regularly shaped constitutions comprises a plurality of voids that enable fluid passage of air and smoke there through.

23. (newly added) The smoking system of claim 21, wherein the shape of the basic regularly shaped constitutions include spherical shapes.

24. (newly added) The smoking system of claim 21, wherein the smoking mixture forms a plug in a funnel shape.

25. (newly added) The smoking system of claim 24, wherein the smoking mixture in funnel shape is further precut with a plurality of perforation lines that define a plurality of distinct portions of the smoking mixture, each portion corresponding to a predetermined number of drawn puffs.

26. (newly added) The smoking system of claim 21, wherein the smoking mixture is rounded.

27. (newly added) The smoking system of claim 21, further the smoking mixture is in a packaging form in which the screen receptacle is assembled with the smoking mixture.

28. (newly added) The smoking system of claim 21, further the smoking mixture is in a packaging form in which a plurality of the smoking mixtures are received in a dispenser.

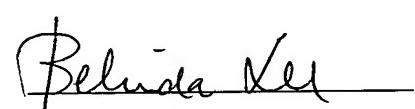

Customer No.: 31561

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Title:

SMOKING SYSTEM COMPRISED OF A JEWELRY OR ORNAMENTAL SMOKING DEVICE AND A [METHOD OF FORMING A]SMOKING MIXTURE

In the Claims:

Please cancel claims 9-20 without prejudice or disclaimer.

Please add new claims 21-28.

1. (Amended) A[n ornament or jewelry] smoking [device]system comprising:

an ornamental smoking device comprising,

_____ a camouflaging body, externally formed in an ornamental shape that is comprised of a thermally insulating material;

_____ a receptacle, concealed in the camouflaging body, and adequately shaped to receive a smoking mixture;

_____ a mouthpiece, concealed in the camouflaging body and communicating with the receptacle in the camouflaging body to enable a user to draw smoke; and

_____ a screen and a filter, mounted within the camouflaging body in a manner to enable fluid passage and fluid filtering while substantially blocking passage of the smoking mixture from the receptacle through the mouthpiece; and

a smoking mixture formed in a prescribed shape, wherein a user places said smoking mixture into said receptacle that is concealed in said camouflaging body of said ornamental smoking device for smoking said smoking mixture.

2. (Amended) The smoking [device]system of claim 1, wherein the screen and the receptacle are formed [in]as a single integral screen receptacle element[of screen receptacle].

3. (Amended) The smoking [device]system of claim 2, wherein the screen receptacle is detachably mounted to an opening of the smoking device.

4. (Amended) The smoking [device]system of claim 3, wherein the screen receptacle is detachably mounted to a hollow base of the smoking device having a hollow interior in which is positioned the screen receptacle, the hollow interior further communicating with the mouthpiece.

5. (Amended) The smoking [device]system of claim 4, wherein the smoking device is configured to be able to receive water within the hollow base by detaching the screen receptacle, the water being used to cool down drawn smokes.

6. (Amended) The smoking [device]system of claim 1, further provided with at least a mounting element that enables a user to wear the smoking device as a jewelry item.

7. (Amended) The smoking [device]system of claim 6, wherein the mounting element includes a chain, a holding ring, a necklace, a clasp, or a pin.

8. (Amended) The smoking [device]system of claim 2, wherein the screen receptacle is formed in a funnel shape so as to enable the placement of a loose smoking mixture in the smoking device by dipping the screen receptacle into the loose smoking mixture.
